

How to archive and find all your data simply and quickly?

WHITE BOOK

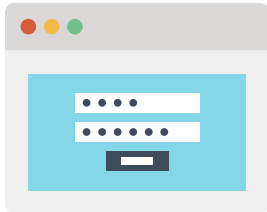

**CLICK 'N
CLASS**

www.clicknclass.com

CLICK 'N CLASS ?

How does it works ?

What is this ?

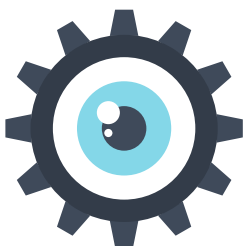

Our new concept of CLICK n' CLASS is very simple !
This is an on-line service allowing you to archive, to classify and to find very simply all your documents and data from everywhere, any time, through a quite simple Internet connection...

... and is it fully secured ?

Your on-line web portal is totally secured.
You can reach it thanks to a user name and a password with security encryption comparable to a bank.

... how may I find my documents?

Once connected, the search engine is going to allow you to make a enquiry with a simple request, exactly as for all web researches.

All the documents which corresponding to your request will then appear.

And what happens if I do not find my document because the portal proposes me too much information?

It's provided !

The portal is "intelligent" enough to propose you a whole outfit of tools allowing you:

- to refine your queries,
- to classify your documents with index cards of classification,
- to work with fields for various necessary information,
- to order your documents in files classified by themes, by name, by date...

You can use it according to various manners to find your information..

The portal has no limits, it is ready to help you in your daily work, because it works according to comply with all your constraints !

«The Limit of our Web portal, it is your imagination»

But, I have important documents on paper, how may I integrate them into the portal ?

In this case, a quick simple processing of scanning your documents, will allow you to extract from it from digital files that can be exploited easily by the software, and be restored under computing documents.

«Easy file 'n find»

I'm not sure to be able to do ...

Our solution includes very successful and very simple tools capable of getting back any sorts of documents on paper in a professional way by you or your team... You can also call on to our teams which will know how to guide you.

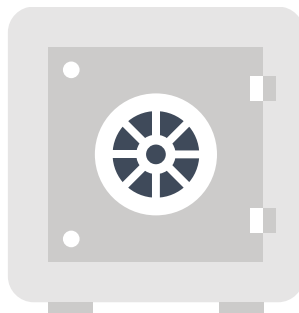

...In any case it is not for me...

On the contrary, our solution is applicable to every category of user, from the private individual , students or companies, whatever their size, including the craftsman , the sole proprietor or professionals.

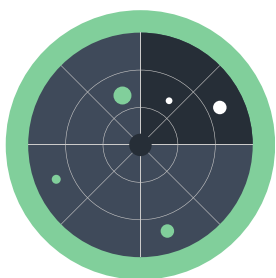

CLICK 'n CLASS solution allows

- to order its own documents better than any other existing tool,
- to find quickly, in a secure and easy way all its documents from anywhere in the world,
- to share its own documents

Nowadays , any user quickly intends to find some benefit in doing so, because everybody has from now on a larger number of personal important information to protect in safety conditions.

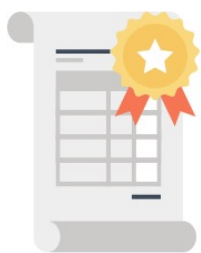

What assures me that my data are safe?

The servers of CLICK n' CLASS solution are installed in a hosting among the most demanding in France. Our data servers permanently benefit from replications and protections, to guarantee you a full availability of your data and tranquility as for their sustainability.

May I certify my documents?

The data certification via a certification authority is possible to ensure sustainability and legality all your documents, in particular thanks to a timestamp of entry to the system.

... But all this should be expensive !

Our services propose several levels of pricing which allow to answer all the budgets.

From the lowest price list , adapted to an individual user (student, particular or very small company), to main users concerning more important levels of uses...

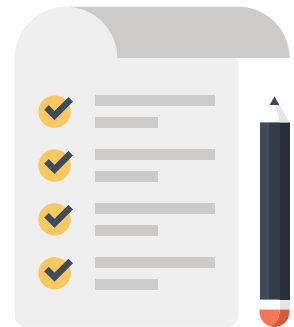

Does your solution can manage any document types?

PDF, Windows Office, documents including pictures , photos, Video documents... We can process any possible and conceivable document types.

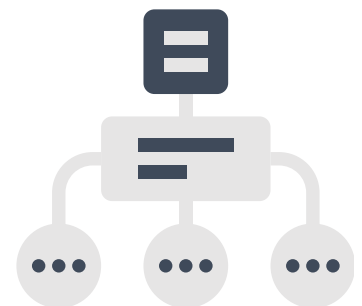

Even if I have « wired » extension documents

If on your computer you have a software allowing to read these documents, you can send them easily to CLICK n' CLASS, track them and handle them without any problem !

And if I have to share work papers with colleagues?

The portal will allow you to organize your work, to modify your documents, to manage the document version, either on the contrary you can also block the access to certain documents to keep them for yourselves only or decide with whom to share them !!!
